# Dylan Silva

**AI Strategy · Enterprise Automation · Executive Advisory**

Austin, TX | 713-816-9683 | rdylan.silva@gmail.com | linkedin.com/in/rdylan-silva

## SUMMARY

Accenture technology architecture consultant applying AI-driven workflow design to funded, shipped automation. For a Fortune 500 financial services client: 4 releases lifted straight-through processing (STP) 79%, 2 funding gates secured, 96% STP uplift projected over 5 years on 150M+ transactions.

## EXPERIENCE

**Accenture** — Technology Architecture Consultant **Jan 2025 – Present**

*Client: Fortune 500 Retirement & Financial Services Provider*

- Owned scope, schedule, and governance for a multibillion-dollar money-movement automation, defining future-state workflows and applying AI tools; projected 96% STP uplift over 5 years on 150M+ transactions.
- Directed 4 client-facing software releases that lifted STP 79%, running solution design, risk logs, and AI-driven workflow creation to accelerate key deliverables.
- Secured 2 funding-gate approvals by advising client executives and aligning business and IT leaders.

*Client: Fortune 500 Global Logistics Company*

- Led 20+ executive discovery and requirements workshops across multiple business organizations to architect and govern a scalable enterprise data product platform.
- Converted discovery insights into service architecture blueprints and end-to-end journey maps for 30+ internal and external personas, defining data flow lifecycles.
- Briefed C-level leadership weekly via progress read-outs, solution demos, and proactive risk debriefs.

**Boeing** — Solutions Engineer **Jul 2023 – Jan 2025**

- Led implementation of a cloud platform unifying requirement specs, CAD models, test suites, and simulations into one source of truth for system specs, modernizing legacy processes.
- Refined requirements with solution architects and client stakeholders into platform enhancement designs.
- Drove delivery to production readiness, tying digital roadmaps to leadership goals via risk mitigation reports, project logs, and roadblock resolution.

**Nisum** — Software Consultant **Jul 2022 – Nov 2022**

- Engineered high-throughput Apache Kafka data ingestion pipelines in Python and SQL, boosting real-time data availability 40% for predictive analytics.

**Saight Dev** — Web Developer (Contract) **Mar 2020 – Jun 2021**

- Led client discovery and requirements sessions with small-business owners, translating non-technical needs into website specifications and development priorities.

## SKILLS

**AI & Automation:** AI-driven workflow design, AI-assisted delivery, STP automation, process modernization
**Discovery & Architecture:** requirements gathering, service blueprinting, journey mapping, data governance
**Leadership:** executive advisory, cloud program management, change management, risk mitigation, Agile
**Technical:** Python, SQL, Apache Kafka, event-driven architecture, React, Redux, PostgreSQL, Tableau, Figma

## EDUCATION

**The University of Texas at Austin** — BA Economics, Minor in Business Foundations **May 2021**
